# VALUE PROPOSITION

## 360 Degrees Support

Our Managed Security Service provides niche subject matter expertise that clients need without having the complexity of managing it from their side. We focus to provide support and enhancements to drive continuous improvement.

## Trusted Advisors

Our mission is to be the trusted advisor/partner when it comes to securing the information and assets that power business performance. We become part of our clients' team as we deliver best in class technologies, practices and personnel to support the security vision.

## VXO ADVANTAGE

Our deep domain and product expertise help clients maximize return from their investment in their strategic cyber security initiatives

## Custom Made Delivery

We do not believe in the "One size fits All" approach. Hence our approach for every engagement will be tailored to suit the specific individual requirements of the clients. We ensure that business requirements are met and the solution we provide helps deliver measurable business benefits.

## Domain & Product Expertise

We bring deep domain & functional expertise and take a holistic approach in all our engagements to help our clients make confident technology decisions.

## Cost Effective Delivery Model

Our priority is to deliver the best technologies and complex projects with minimal cost and disruption while enabling highly effective cyber security programs.

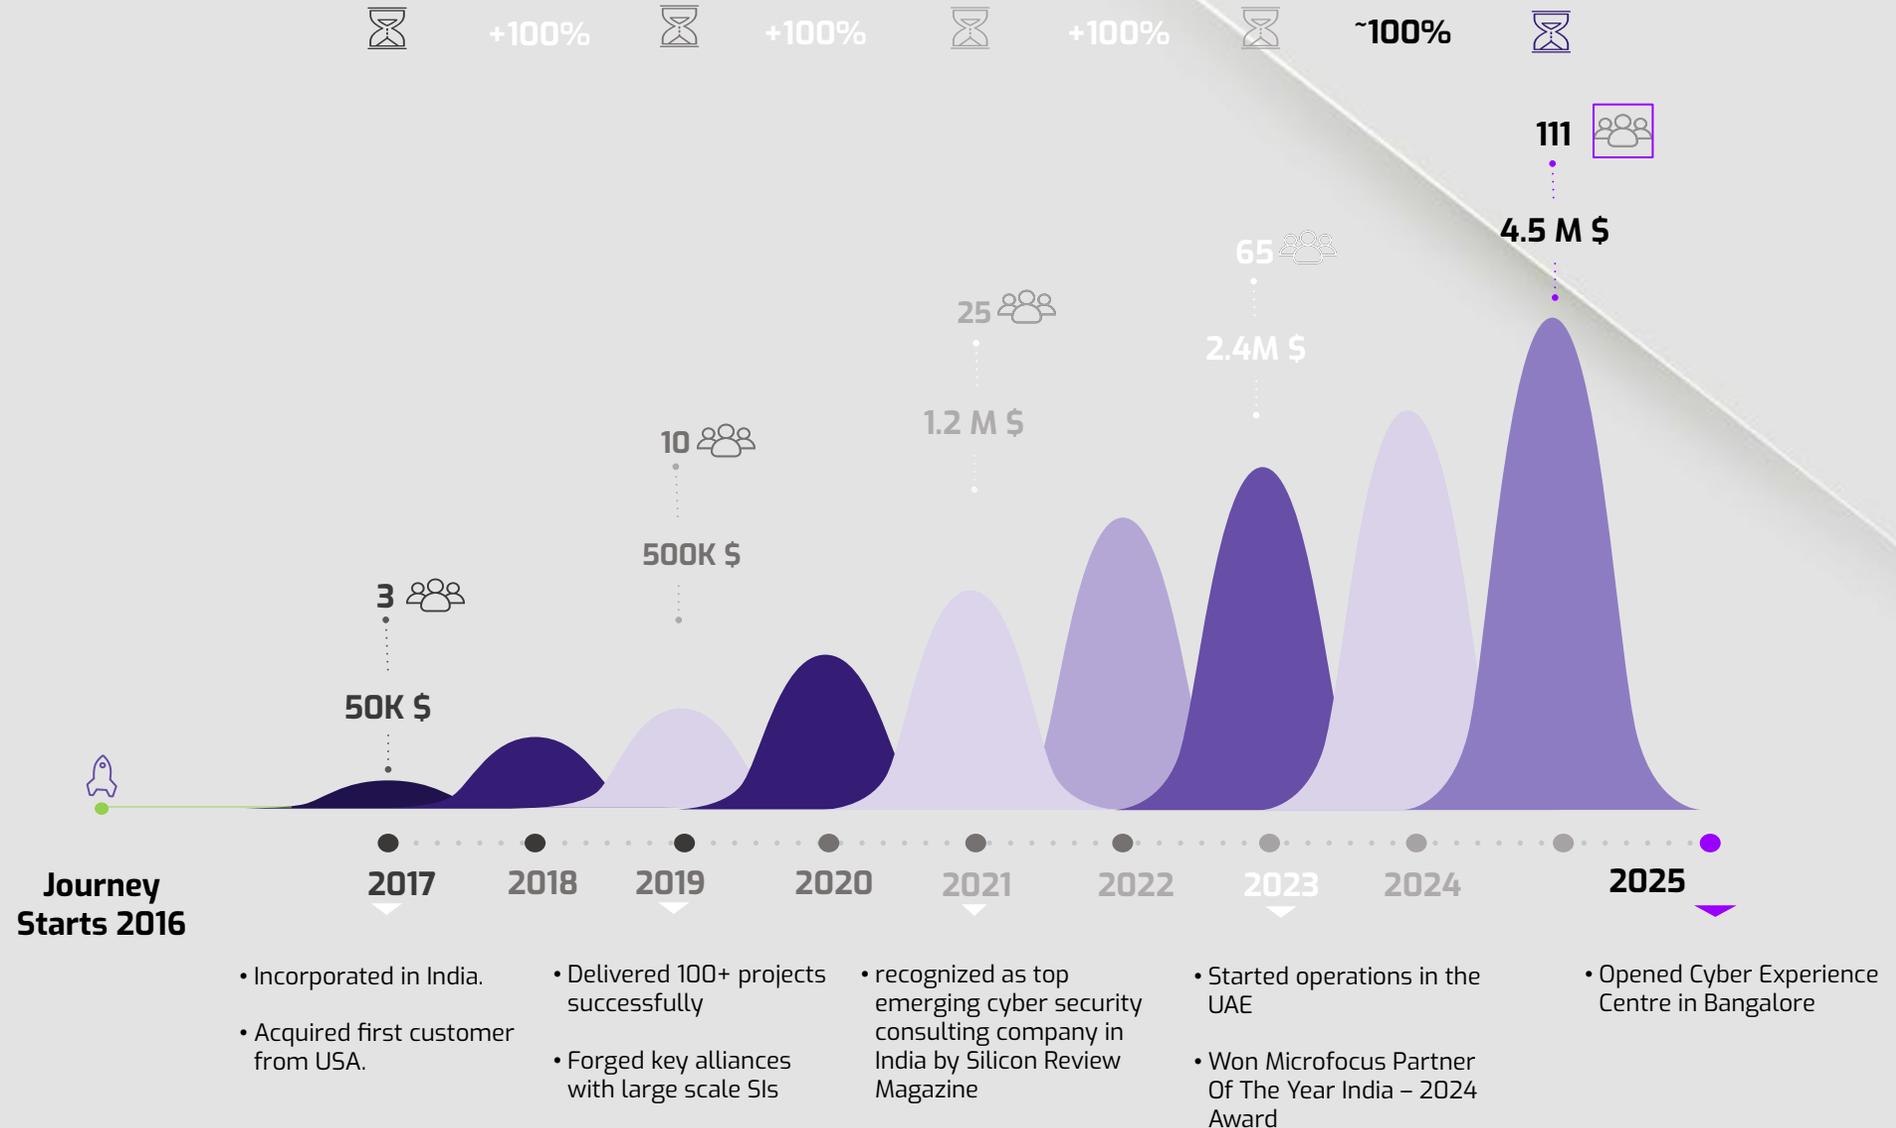

## Strategic Alliances

We have developed strong relationship with our strategic partners to ensure our clients receive the most robust solution and complete support.

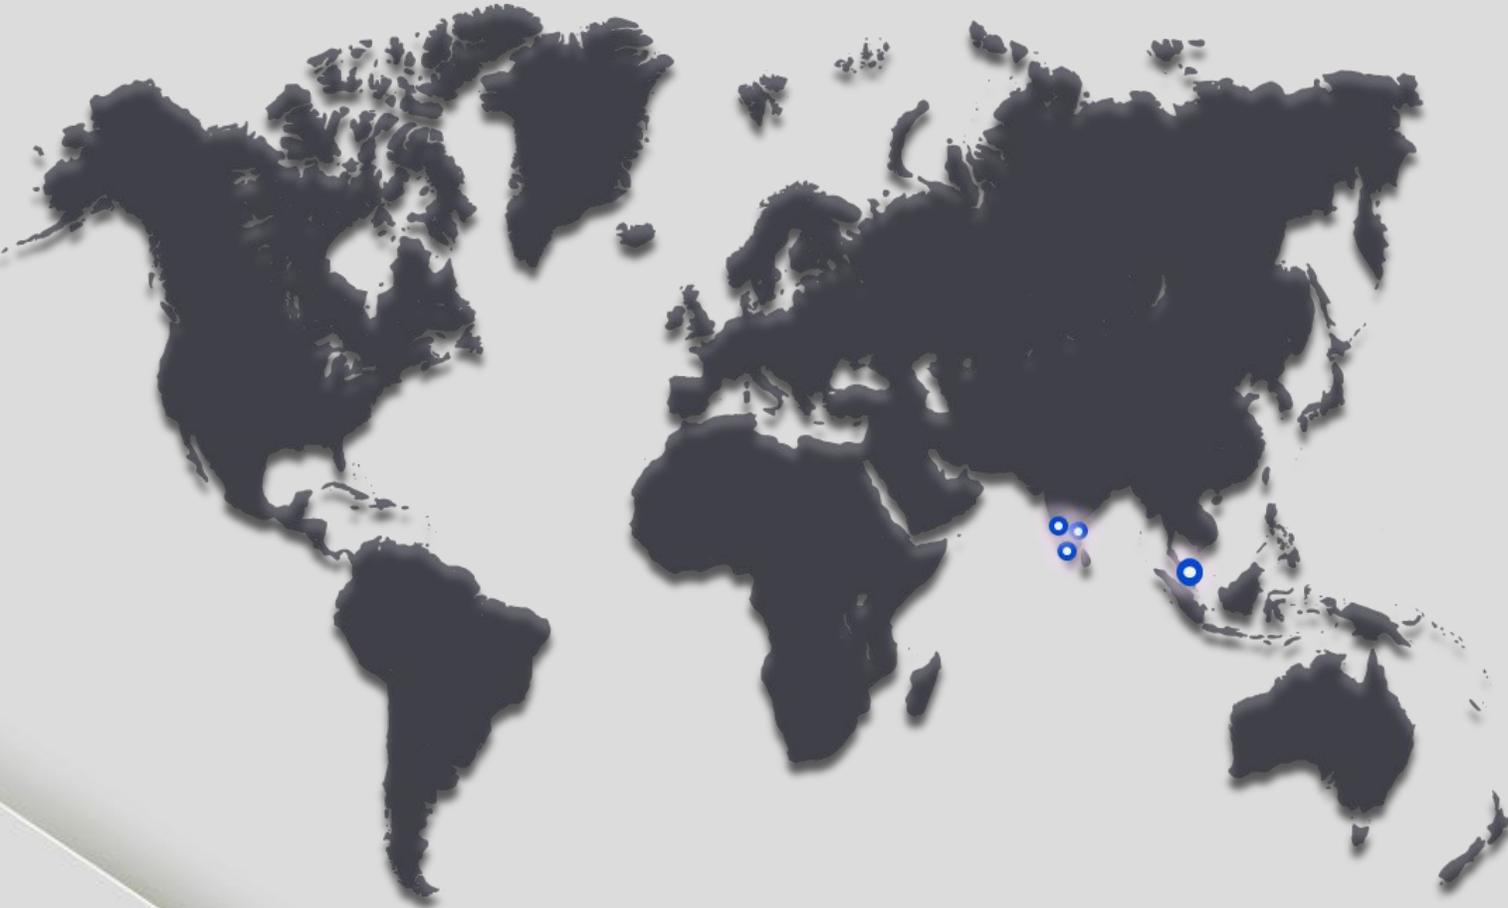

# JOURNEY SO FAR

## Our Story

- VXO as VSQUARE Technologies started its journey in 2016 with an intent to become one of the premier cyber security consulting firm
- Since our inception, our growth has been very organic yet quite fast. We have been growing almost up to 100% both from business as well as people front
- This has been possible because of our client centricity, quality of deliver, strong partner ecosystem and our commitment towards our alliances.

**VXO A Partner You Can Trust: Cybersecurity is a shared responsibility, and it boils down to this: In Cybersecurity the more systems we secure, the more secure we all are. Your company's strength can be defined by how robust your cyber security is.**
